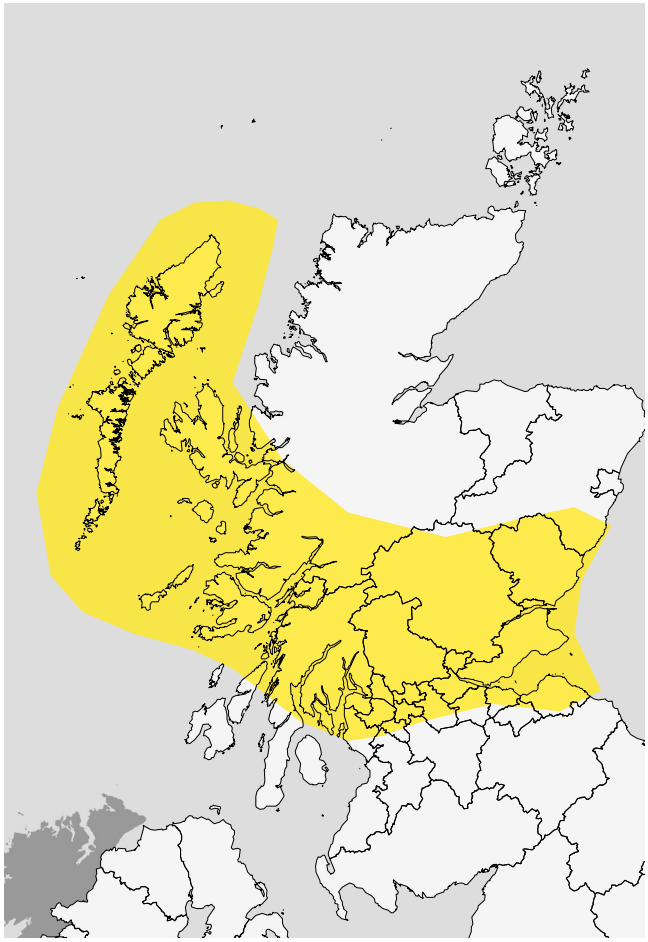
Yellow warning
**Wind**

Between
**03:00 Thu 10 Feb 2022** and
**12:00 Thu 10 Feb 2022**



## Strong winds may lead to some disruption on Thursday morning.

### What to expect

- Some short term loss of power and other services is possible
- Some delays to road, rail, air and ferry transport are likely
- Difficult driving conditions and possible delays for high-sided vehicles on exposed routes and bridges

### Further details

A brief period of severe gale force westerly winds will develop across the Western Isles during the early hours of Thursday morning bringing gusts up to 70-75 mph, the Uists most likely to see the strongest winds. Then a brief period of strong to gale west to southwesterly winds will transfer quickly eastwards across the rest of the warning area on Thursday morning, gusts typically around 50 mph, but perhaps approaching 60 mph in a few locations. Whilst such wind speeds are not unusual for the time of year, recently weakened trees and structures may mean a greater likelihood of localised damage or disruption.
